

Custom Touchpad & Trackpad for Industrial & OEM Applications

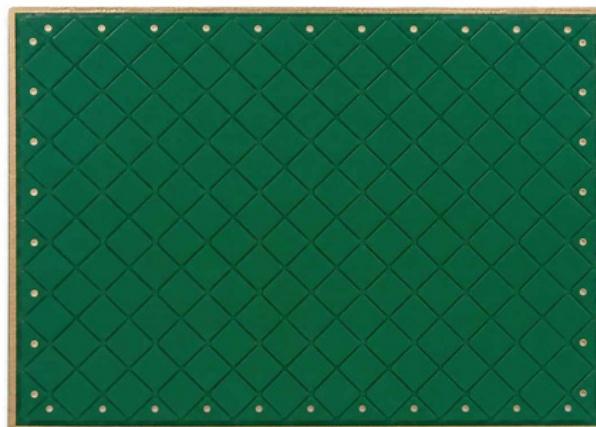

Precise, responsive and customizable touch-based cursor control
for keyboards, PCs and industrial equipment.

✦ Product Overview

The LP4344 Linepro's custom touchpads and trackpads provide precise cursor control and responsive touch operation for electronic and industrial equipment. Designed for OEM integration, these touchpads can be customized to meet specific mechanical, electrical and application requirements.

✦ Key Features :

- USB Interface
- Capacitive Sensing
- Compact Design
- OEM Customization
- Windows & Linux
- MacOS support
- Industrial Applications
- Easy Integration

Custom Touchpad & Trackpad for Industrial & OEM Applications

Precise, responsive and customizable touch-based cursor control
for keyboards, PCs and industrial equipment.

✦ Technical Specifications :

Specification	Details
Model No	LP4344
Product Type	Custom Touchpad / Trackpad
Touch Technology	Capacitive Sensing
Interface	USB
Input Voltage	5V DC
Operating Voltage	1.8V to 5.5V
Current Consumption:	<20 mA
Operating System	Windows & Linux
Operating Temperature	-40°C to +80°C
Cursor Movement	Supported
Single & Double Click	Supported
Click & Drag	Supported
MacOS	Supported
Design	Compact & Customizable
Integration	OEM & Industrial Applications
Customization	Available

● — Custom Touchpad & Trackpad for Industrial & OEM Applications — ●

Precise, responsive and customizable touch-based cursor control
for keyboards, PCs and industrial equipment.

✦ Touch Functions:

- Cursor Movement
- Single Click
- Double Click
- Click & Drag

✦ Applications

- Industrial Keyboards
- Kiosks & Self-Service Terminals
- POS & Commercial Equipment
- Industrial Control Systems
- OEM Electronic Equipment

✦ Customization Options:

Mechanical Design

- Custom dimensions
- Mounting requirements
- Product integration

Electrical Interface

- USB interface
- Application-specific requirements

System Integration

- Keyboard integration
- Control panel integration
- OEM equipment integration
